 $\Omega_b(6340)^-$  MASS

VALUE (MeV)	DOCUMENT ID	TECN	COMMENT
<b><math>6339.7 \pm 0.3 \pm 0.5</math></b>	<sup>1</sup> AAIJ	20T LHCb	$pp$ at 7, 8, 13 TeV

<sup>1</sup> AAIJ 20T measures  $m(\Omega_b(6340)^-) - m(\Xi_b^0) = 547.81 \pm 0.26 \pm 0.05$  MeV. We have adjusted the measurement to our best values of  $m(\Xi_b^0) = 5791.9 \pm 0.5$  MeV. Our first error is their experiment's error and our second error is the systematic error from using our best values.
