WEIGHTED AVERAGE  
 $1318.6 \pm 1.3$  (Error scaled by 1.4)

- <sup>1</sup> Statistical error negligible.
  - <sup>2</sup> From a fit to  $J^P = 2^+ \rho\pi$  partial wave.
  - <sup>3</sup> Superseded by AGHASYAN 2018B.
  - <sup>4</sup> From analysis of L3 data at 183–209 GeV.
- $a_2(1320)$  mass,  $3\pi$  mode (MeV)

<sup>1</sup> The systematic error of 2 MeV corresponds to the spread of solutions.

<sup>2</sup> From T-matrix pole based on combined fit of Crystal Barrel and  $\pi\pi$  scattering data (ALBRECHT 20), and COMPASS data (ADOLPH 15), using a coupled-channel model of  $\eta\pi, \eta'\pi$  and  $K\bar{K}$  systems.

<sup>3</sup> T-matrix pole with 2 poles, 2 channels ( $\pi^0\eta$  and  $K\bar{K}$ ).

<sup>4</sup> The coupled-channel analysis of both the  $\eta\pi$  and  $\eta'\pi$  systems using ADOLPH 15 data. The width is extracted from the T-matrix pole.

<sup>5</sup> Superseded by RODAS 19.

<sup>6</sup> ADOLPH 15 value is derived from a Breit-Wigner fit with mass-dependent width taking the  $\eta\pi$  and  $\rho\pi$  channels into account.

<sup>7</sup> Resolution is not unfolded.

<sup>8</sup> Missing mass with enriched MMS =  $\eta\pi^-, \eta = 2\gamma$ .

**CONSTRAINED FIT INFORMATION**

An overall fit to 5 branching ratios uses 18 measurements and one constraint to determine 4 parameters. The overall fit has a  $\chi^2 = 9.3$  for 15 degrees of freedom.

The following *off-diagonal* array elements are the correlation coefficients  $\langle \delta x_i \delta x_j \rangle / (\delta x_i \delta x_j)$ , in percent, from the fit to the branching fractions,  $x_i \equiv \Gamma_i / \Gamma_{\text{total}}$ . The fit constrains the  $x_i$  whose labels appear in this array to sum to one.

<sup>1</sup> KARSHON 74 suggest an additional  $I = 0$  state strongly coupled to  $\omega\pi\pi$  which could explain discrepancies in branching ratios and masses. We use a central value and a systematic spread.

<sup>2</sup> Decays to  $b_1(1040)\pi$ ,  $b_1 \rightarrow \omega\pi$ . Error increased to account for possible systematic errors of complicated analysis.
